

How to Find a Brick

This list is sorted alphabetically by the last name of the person, or the organization name, that the brick is Dedicated To.

The Assigned Location is defined as follows:

Example: DW133

First letter specifies the column that the brick is located on.

The second letter specifies the color of the brick (R = all red, W = all white, B = all blue in star field)

The three digit numeric character specifies the Brick Position on the column (see diagram on next page). Brick Position #1 starts on the third row from the bottom on the left side of the column. Brick Position #293 is on the right side of 47th row at the top of the column.

The Rows are numbered with row number 1 on the bottom of the column and row number 47 on the top of the column (see diagram on next page).
